FALKE Women's Legwear Autumn/Winter 2023/24

Beyond Origins

The FALKE Autumn/Winter 23/24 collection reflects the cold seasons with pleasantly warm materials, quality as well as a reflection of the brand's origins. The capsules of the collection follow the concept of originality as well as different colour worlds and patterns. New styles and designs are complemented by FALKE classics in seasonal trend colours.

Natural Origins

The geometric base of the **FALKE Temple Angel** tights with 3D structure reflects the archaeological era and thus forms a pillar of the Natural Origins capsule, which corresponds to the ideal of beauty of Greek and Roman culture and its straight lines. The special feature of the **FALKE Origin Flaw** tights is its stripe-like microtexture, which is created by small interruptions in the base made of tulle. The perfect FALKE fit completes the style.

Beyond Imagination

The age of the metaverse is represented by the fashionable **FALKE Electricity** sock. Its intense colours seem to blend into one another, giving the soft and sustainable material composition made of organic cotton a digital look. Thanks to their transparency, the graceful lotus flowers of the **FALKE Nile Jewel** of the chic knee-high stand out and become eye-catchers of elegant business outfits.

Stripe-up-your-life

The **FALKE Ritual** tights feature a close-meshed net with vertical, thicker meshes. Wavy embellishments give them a particularly feminine lingerie look.

Bootsocks

Created using a special knitting technique, the **FALKE Monument** features a high waistband, making the voluminous sock made from high-quality wool and sustainable organic cotton a fashionable highlight in autumnal boots. Finally, the perfect FALKE fit with pleasant wearing comfort rounds off the design.
